ARINSO International Chooses Rev-Trac for Enhanced SAP Change Management of HR Application

HR integration specialist selects Rev-Trac for powerful, flexible, full-featured change management solution

Melbourne, Australia – July 16, 2007 – Revelation Software Concepts Pty Ltd (RSC), member of the SAP® Software Partner program, today announced that global HR specialist ARINSO International (Euronext Brussels: ARIN) has selected RSC's Rev-Trac® change management solution for its SAP-based business information infrastructure.

ARINSO employs over 2,500 staff in 27 countries on five continents, providing HR solutions to one in five of the world's biggest companies. Through the HR Management Systems it has installed, ARINSO serves over 6 million employees. In addition, its HR Outsourcing solutions now serve 600,000 employees worldwide. ARINSO is part of UK-based Northgate Information Solutions.

Globally, Rev-Trac provides enhanced change control capabilities to many major organizations with SAP-based IT systems. At ARINSO, Rev-Trac brings the ability to manage customers' rapidly changing HR needs efficiently, effectively, in an auditable manner and at the lowest cost. It will help ARINSO to ensure its outsourced services remain cost competitive, even in highly regulated environments. ARINSO selected Rev-Trac because it can enforce change control processes, provide automated workflow and automated transport migrations, and has built-in sequencing error prevention. Together, these capabilities were considered a compelling argument for partnering with RSC in change management technology.

ARINSO had been aware of Rev-Trac for some time as a key outsource partner to an existing Rev-Trac user. As an SAS 70 audit regulated company, ARINSO saw Rev-Trac's seamless integration, its flexibility of configuration and its reliable process enforcement as essential to

support ARINSO's internal control audit compliance requirements. Following investigation, including in-house development, no other solution was found to reliably prevent inadvertent visibility into dedicated, separate systems, which demonstrates the level of process control Rev-Trac achieves.

"As a global Application Services Provider (ASP), ARINSO is subject to the often rapidly changing business processes and varying regulatory requirements of many geographic regions at once, making tightly managed change control a high priority," said David Drake, founder and CEO at RSC. "Rev-Trac's automated SAP change control tools will help ARINSO ensure the continuing stability of their SAP-based system, reduce their costs of compliance and help manage continuing changes as needed for one of the world's largest shared HR facilities."

About Revelation Software Concepts

Headquartered in Melbourne, Australia, Revelation Software Concepts (RSC) has earned the trust of some of the world's largest corporations since 1997 with its change control application Rev-Trac for use with SAP solutions. RSC's business strategy is 100% focused on SAP solutions. The ongoing evolution and extension of Rev-Trac as a web-enabled application and the development of RSC's xReports interactive, cross-application reporting application accessible via an SAP GUI demonstrate the company's commitment to creating solutions that are technologically superior, simple to use and that promote transparency and collaboration. Revelation Software Concepts is an SAP Software Partner. Rev-Trac 5 has achieved "Powered by SAP NetWeaver" status for its integration with SAP Basis Release 4.6, SAP R/3® Enterprise 4.7 and SAP NetWeaver Application Server Release 7.0.
