Rev-Trac 5.0 Receives SAP Certification for Integration With SAP® R/3® Enterprise 4.7 and SAP NetWeaver™

Extensive testing validates integration with SAP's newest platforms

Boston, MA – May 17, 2005 – Revelation Software Concepts Pty Ltd (RSC), a member of the SAP® Software Partner program, today announced at SAPPHIRE® '05 that its change control application, Rev-Trac® 5.0, has been certified as an ABAP™ add-on for the SAP R/3® Enterprise solution Release 4.7 and certified as "Powered by SAP NetWeaver™". These certifications help assure customers that the close integration of Rev-Trac 5.0 with SAP's new enterprise solutions has passed the most rigorous testing. With these certifications comes the right for RSC to use the SAP "Certified for SAP NetWeaver" tagline, indicating that Rev-Trac 5.0 runs seamlessly on the SAP NetWeaver open integration and application platform.

"As an SAP partner, we're excited to be working with the new platform", said Dave Drake, RSC founder and CEO. "These new certifications underline our commitment to giving the broadest possible range of SAP customers a competitive edge in the change control arena, from older releases of SAP solutions right through to the latest architecture. We plan for all of our future Rev-Trac development to be fully compatible with SAP NetWeaver."

Rev-Trac 5.0 is powered by the SAP NetWeaver platform, the open integration and application platform that provides the best way to integrate all systems running SAP or non-SAP software. SAP NetWeaver unifies integration technologies into a single platform and is pre-integrated with business applications, enabling change and reducing the need for custom integration. The platform is based on industry standards and supports all major technologies, such as Java 2 Platform Enterprise Edition (J2EE), Microsoft .NET, and IBM WebSphere.

RSC's Rev-Trac 5.0 manages changes in SAP solutions from Release 4.0 through to 4.7, safely, flexibly, and efficiently – providing full auditing, change tracking and accident prevention capabilities in even the most diverse and dynamic environments with minimal impact on existing work practices.

Details on RSC Rev-Trac 5.0 are available at <http://www.xrsc.com> and this week at Booth #1363 at SAPPHIRE.

About Revelation Software Concepts

Headquartered in Melbourne, Australia, Revelation Software Concepts Pty Ltd has earned the trust of some of the world's largest corporations since 1997, developing robust software applications that help customers obtain maximum competitive advantage from their SAP solutions. An SAP Software Partner, RSC's business strategy is 100% focused on SAP solutions. RSC's change control tool Rev-Trac® for SAP solutions and cross-application reporting product xReports® demonstrate the company's preparedness to think 'outside the box' when developing superior software solutions. Technologically innovative, both products reflect RSC's commitment to creating solutions that are simple to use and promote business transparency and collaboration. Rev-Trac 5.0 is an SAP-certified add-on for SAP R/3 4.6 and SAP R/3 Enterprise 4.7 and is "Powered by SAP NetWeaver". For more information, visit <http://www.xrsc.com>.
