## Revelation Software Concepts Publishes Change Control Architecture White Paper, Available for Download at SAP® EcoHub Solution Marketplace

*Company embraces SAP EcoHub with delivery of "Rev-Trac® and Your SAP Infrastructure" white paper, highlighting how change control fits into an SAP solution-based environment*

**Melbourne, Australia – April 27, 2009** - Revelation Software Concepts Pty Ltd (RSC), an SAP® software solution partner, today announced the availability of "Rev-Trac® and Your SAP Infrastructure," a white paper on how change control solutions fit in with an SAP solution-based environment. The announcement came with the launch of RSC's participation in the SAP EcoHub solution marketplace, where customers can easily discover, evaluate and purchase partner solutions - such as the Rev-Trac change control solution - that complement SAP applications.

The SAP EcoHub provides customers access to a wide variety of complementary solutions and offerings that work best with their existing SAP solutions. The SAP EcoHub integrates community input, user feedback, ratings and partner demos, enabling a more educated and intelligent evaluation and selection of solutions.

The evolution of SAP solution-based infrastructures toward greater size and higher complexity, plus increased requirements for efficient, error-free system maintenance in rapidly changing markets, has led to greater adoption of third-party solutions that build on, and complement, SAP ERP. The white paper will help SAP customers gain a better understanding of how SAP ERP accommodates these third-party enhancements and how a well-integrated, change control solution can help this process.

"It was natural to publish this change control architecture white paper through the SAP EcoHub, since that is the most vital and important marketplace for third-party enhancements of all kinds," said Rick Porter, vice president of business development at RSC. "The SAP EcoHub is where SAP users go to find properly integrated and certified solutions for use with their SAP applications, including such important add-ons as system change control solutions."

As an established independent software vendor offering solutions in support of SAP offerings, Revelation Software Concepts has made serving the needs of customers using SAP solutions a top priority. Rev-Trac 5.0 has been SAP-certified as powered by the SAP NetWeaver® technology platform.

Rev-Trac is the market-leading third-party solution for system change management in support of SAP solutions, a field where RSC has pioneered for the past decade. Such features as support for the Enhanced Change and Transport System (CTS+) of the SAP NetWeaver Application Server (SAP NetWeaver AS) for enabled transports in mixed Java and ABAP™/4-based stack environments, have enabled RSC to welcome many of the world's largest companies as Rev-Trac users.

SAP EcoHub is live at <http://ecohub.sap.com>. Visitors can search for solutions in many ways, including industry or solution, key words, relevance or partner. Solutions can be evaluated online based on feedback from other users, partners and business experts. Visitors can view an online demo on SAP EcoHub or request more information by requesting to be contacted, and initiate the purchase of the solution.

Rev-Trac is listed at <https://ecohub.sdn.sap.com/irj/ecohub/solutions/revtrac>. Resources available for download from SAP EcoHub include a Rev-Trac technical data sheet, the new architecture white paper and several customer success stories. Also provided are certification details for Rev-Trac and the ability to request a live demo or contact from Revelation Software Concepts. More on Revelation Software Concepts and its products can be found at [www.xrsc.com](http://www.xrsc.com), and at the co-located SAPPHIRE® 2009 and 2009 ASUG Annual Conference in Orlando, May 11-14, Booth #627.

### **About Revelation Software Concepts**

Revelation Software Concepts (RSC) specializes in change control management for use with SAP solutions, developing market-leading technology to reduce the risks and lower the costs of delivering changes into information systems. Since RSC was founded in 1997, some of the world's largest companies have come to rely upon its mature change control solutions. Its deep expertise and responsive support have made RSC the leading change-control specialist for SAP solution-based infrastructures around the globe. RSC is 100% SAP-focused and is an SAP software solution partner. Its flagship change control solution, Rev-Trac, is certified as powered by SAP NetWeaver. Rev-Trac supports change control for both ABAP and non-ABAP technologies, reflecting RSC's commitment to technologically innovative change control solutions that serve current market needs. For more information, visit <http://www.xrsc.com>.
