Revelation Software Concepts Opens German Office

New regional office serves Germany, one of the mainstay markets of users of SAP® solutions, and Europe

Atlanta, April 23, 2007 - Revelation Software Concepts Pty Ltd (RSC), an SAP® Software Partner, today announced it has opened an office in Stockdorf, Germany to enhance the company's access to customers both in Germany and throughout Europe. RSC's German office will help the company provide quick responses to customers throughout the entire European region as the market for SAP solution-based business information solutions continues to grow there.

Germany currently represents one of the mainstay markets of users of SAP solutions, and with RSC Rev-Trac® adoption growing significantly in the rest of Europe over the past few years, this new office is a natural extension of RSC's reach. The number of organizations supporting numerous business entities and multiple deployments of SAP solutions across various global regions is increasing. At the same time there is a growing need for organizations to design and adhere to predetermined change control processes due to both internal and external pressures such as Sarbanes-Oxley, SAS 70 and Basel II regulations. These pressures bring with them increased costs due to the need to more closely manage the risks associated with constant growth and constant system change.

RSC's Rev-Trac targets the largest 15 percent to 20 percent of users of SAP solutions who have reached a size at which homegrown change control solutions no longer suffice and automated enforcement and management of change control processes is seen as a major cost-saving and risk-mitigation strategy. The German office will allow direct support for organizations needing the process automation and enforcement provided by Rev-Trac, RSC's change control solution for use with SAP applications.

"With the growing awareness by organizations of the need for an application specific change control tool, it made sense to locate an office at one of the main hubs of regional activity of users of SAP solutions," said Rick Porter, vice president of business development at RSC. "We're looking forward to working closely on a more local basis with our growing European customer base."

Today's announcement was made at SAPPHIRE® '07 Atlanta, SAP's international customer conference being held April 22-25. RSC is exhibiting at SAPPHIRE in booth 1623. More information on RSC's Rev-Trac can be found at <http://www.xrsc.com/Rev-Trac.html>.

About Revelation Software Concepts

Headquartered in Melbourne, Australia, Revelation Software Concepts (RSC) has earned the trust of some of the world's largest corporations since 1997 with its change control application Rev-Trac for use with SAP solutions. RSC's business strategy is 100% focused on SAP solutions. The ongoing evolution and extension of Rev-Trac as a web-enabled application and the development of RSC's xReports interactive, cross-application reporting application accessible via an SAP GUI demonstrate the company's commitment to creating solutions that are technologically superior, simple to use and that promote transparency and collaboration. Revelation Software Concepts is an SAP Software Partner. Rev-Trac 5 has achieved "Powered by SAP NetWeaver" status for its integration with SAP Basis Release 4.6, SAP R/3® Enterprise 4.7 and SAP NetWeaver Application Server Release 7.0.
