## **Revelation Software Concepts' Rev-Trac Change Control Application Achieves "Powered by SAP NetWeaver®" Status for Integration with SAP NetWeaver Application Server 7**

*Certified Integration demonstrates vendor's continuing commitment to supporting customers using the latest SAP® solutions*

**Atlanta, April 23, 2007** - Revelation Software Concepts Pty Ltd (RSC), an SAP® Software Partner, today announced its Rev-Trac® 5 change control application has achieved "Powered by SAP NetWeaver®" status for integration with the SAP NetWeaver Application Server 7, the latest certification status available for ABAP® add-on third party tools and applications. The Rev-Trac change control application for SAP solutions offers full enforcement of user-defined change control processes, advanced conflict management and accident prevention, and extensive use of automation for process consistency and change control cost reductions. The latest certified integration warrants Rev-Trac's compatibility with the most recent version of the SAP NetWeaver platform, which in turn underpins the SAP business suite of applications.

"Over the past several years, we've seen an increase in the size and complexity of the information solution landscapes where Rev-Trac has been installed," noted David Drake, CEO at RSC. "It is no longer unusual to see a single Rev-Trac installation managing 30 or more systems. The need to simplify the management of such extensive landscapes has driven Rev-Trac's evolution. This, our third solution to achieve SAP certified integration, assures our customers that we remain committed to support their SAP solution-based systems as they continue to grow and develop their environments utilizing the latest versions of SAP applications."

The SAP NetWeaver platform powers the SAP Business Suite family of business applications, SAP xApps™ packaged composite applications and solutions such as Rev-Trac 5 from RSC. SAP NetWeaver unifies integration technologies into a single platform and is pre-integrated with business applications, enabling change and reducing the need for custom integration. Third-party ABAP add-ons such as Rev-Trac 5 that have passed the syntactic and semantic checks that are part of the SAP ABAP add-on certification requirements are eligible to receive certification through the SAP Integration and Certification Center.

Today's announcement was made at SAPHIRE® '07 Atlanta, SAP's international customer conference being held April 22-25. RSC is exhibiting at SAPHIRE in booth 1623.

More information on RSC's Rev-Trac can be found at <http://www.xrsc.com/Rev-Trac.html>.

### **About Revelation Software Concepts**

Headquartered in Melbourne, Australia, Revelation Software Concepts (RSC) has earned the trust of some of the world's largest corporations since 1997 with its change control application Rev-Trac for use with SAP solutions. RSC's business strategy is 100% focused on SAP solutions. The ongoing evolution and extension of Rev-Trac as a web-enabled application and the development of RSC's xReports interactive, cross-application reporting application accessible via an SAP GUI demonstrate the company's commitment to creating solutions that are technologically superior, simple to use and that promote transparency and collaboration. Revelation Software Concepts is an SAP Software Partner. Rev-Trac 5 has achieved SAP certified integration with SAP Basis Release 4.6, SAP R/3® Enterprise 4.7 and SAP NetWeaver Application Server Release 7.0.
