Revelation Software Concepts Announces White Paper Guide to Change Management in SAP Systems

*Changes to extensive SAP systems can be managed
with proper organization and preparation*

Melbourne, Australia – December 29, 2003 – Revelation Software Concepts Pty Ltd (RSC) today released “Issues in Change Management for SAP® Solutions: An RSC Guide,” a white paper describing how global enterprise systems manage changes to SAP-based information systems. The powerful SAP R/3® suite of enterprise applications keeps information flowing, available and up to date in many of the largest global enterprise systems. Managing such extensive systems takes a precise hand, and the Guide describes the techniques IT departments have evolved to deal with the challenges presented.

SAP R/3 manages such crucial business functions as accounting and profitability analysis, sales order processing, purchasing, inventory management and production planning. Each modification or addition to these critical systems can require thousands of delicate, incremental changes over a vast, even global, network to ensure the entire system continues to run smoothly.

“Issues in Change Management for SAP Solutions: An RSC Guide” will help readers understand the technical challenges that must be met to ensure a smooth flow of changes and updates without disruption to SAP systems. It provides a clear, understandable and comprehensive overview, at the system level, of how these global enterprise systems work.

Among many subjects, the Guide discusses how to protect mission-critical production systems from disruption, control the change process, keep an audit trail intact, prevent inadvertent branching or parallel development, track change propagation throughout extensive landscapes, and much more.

Rev-Trac® 5.0, RSC’s global technology leader in change management for SAP-based systems, recently won official SAP certification in the newly created category of the ABAP Add-on. ABAP/4® is the proprietary computer language used to develop software for SAP R/3 solutions. The ABAP Add-on certification indicates Rev-Trac 5.0 may be integrated with confidence at the deepest levels of an SAP solution. ABAP Add-on is a more demanding certification level than the more common SAP Interface certification.

“Issues in Change Management for SAP Solutions: An RSC Guide” can be downloaded in the widely readable Adobe PDF format, free of charge, from <http://www.rev-trac.com/whitepaper.asp>.

About Revelation Software Concepts

Headquartered in Melbourne, Australia, Revelation Software Concepts Pty Ltd develops and publishes the technology-leading and award-winning change management solution for integration with SAP R/3, Rev-Trac. The company has followed its original vision to develop software specifically to aid SAP project teams and their members. Since 1997, the company has been perfecting Rev-Trac into a fully integrated, strategic approach to managing changes in extensive SAP environments, providing safe, transparent and process-compliant development for enterprise-class SAP infrastructure systems. Rev-Trac, the SAP-specific change management software tool, achieved ABAP Add-on certification. For more information, visit <http://www.rev-trac.com>.
