## Sappi Southern Africa Division Reveals Successful Change Control Strategy Using RSC Rev-Trac on Global-System Case Study

*Largest Global Paper Products Producer's Candid Discussion of Problems, Solutions In Change Control Points Way for Large SAP® -Based Information Infrastructures*

**Melbourne, Australia – January 11, 2010** -- Revelation Software Concepts Pty Ltd (RSC), an SAP® software solution partner, and global paper products producer Sappi (NYSE:SPP) Southern Africa Division today published a candid, strategically insightful discussion of change management challenges facing large organizations running global SAP® -based business information systems.

The case study may be downloaded via the link at <http://www.xrsc.com/press-releases.html>

The study reveals how the Johannesburg-based Sappi uses Rev-Trac® by RSC to smoothly manage changes in its SAP-based information system to support production, sales and timely delivery of products worldwide. The system supports sales and operations centers in more than 50 countries, spanning four continents.

Sappi Southern Africa Division produces 1.1 million metric tons of coated, uncoated, packaging and specialty paper products and 2.5 million metric tons of bleached and unbleached paper pulp and chemical cellulose annually for global markets. Supporting this global market requires managing about 540,000 hectares (1.3 million acres) of timber plantation land supplying 18 pulp and paper mills, including the world's largest, the Saiccor Mill. Sappi Southern Africa is the largest global producer of chemical cellulose used in textile, consumer and pharmaceutical manufacture.

Managing the SAP-based infrastructure without disruptions or downtime is a challenging goal for any company and especially for a company with Sappi's reliance on its systems being

available all the time. Sappi met this challenge by automating its change control processes and activities using Rev-Trac, RSC's market-leading third-party change control technology. The study of how this was done makes a fast and informative read.

More on Sappi Southern Africa and its products can be found at <http://www.sappi.com/SappiWeb/za/HomePage>. More on Revelation Software Concepts and its products can be found at [www.xrsc.com](http://www.xrsc.com).
